Equipment

As you are aware, media in education continues to grow at a very fast rate. To assist staff with equipment requirements we have created a library web page that contains information about the equipment available. We can offer training and any assistance you may need.

Assistance

It's great that the Library Media Team have been getting opportunities to work with so many different departments around the school. For those who are not yet familiar with our skill set, our team have skills which cover:

- Video Production
- Animation
- Graphic Design (for print and screen)
- Presentations
- All Adobe Software
- All Microsoft Software
- Live Content Streaming
- Camera and Microphone Operation ...

... and plenty more! So if you need something to help students understand a complex part of your curriculum, we would love to assist you!
Feel free to get in contact with us; it really makes our day when we can assist teaching staff with preparing curriculum work.

*Just remember, no job is too big.... but sometimes timelines can be too small. Keep in mind all our roles include library duties. Giving us more time will give you the assistance you need.*

*Brendan, Sam and Kristen.*

A few of our highlights from the start of the year...

The Spirit Committee approached the team recently to assist with a video.

![Image of Marcus Ray]

These guys are a wonderful example of students who are enthusiastic and have a strong sense of community here at BGS. Working with them in the film studio was hilarious; it’s such a shame the video couldn’t be a little longer. Always happy to help the boys with their Spirit projects!  *Note: This event has been postponed, but we hope to be able to run it next term.*

Year 6 Photoshop Sessions
The year 6 classes were excited to have some Photoshop training. Being library staff we then got to see many of them continue editing their work more in their lunchtimes in the library. Always a pleasure to immerse students in learning that develops intrinsic motivation.

Wonderful to hear that year 5 are still using the "Patrick Logan" video.

Some of you may have seen it, as it was created a few years ago now. It’s a highlight this year for us as we have had some great comments from the boys in passing about how they enjoyed the learning experience. It really is a great example of how we can help create a useful e-learning resource that can be used again and again for years to come. Link

Foundation Day

For the last few years, we have worked alongside the IT department to live stream the Foundation Day ceremony. Each year improvements are made to the setup and we learn from the previous year’s experience. This year we had a perfect stream, no loss of frames, crystal clear audio multi-angle with data screen input. The result is almost as good as being there in person although, according to a few teachers, it is actually better in the Forum viewing the streaming... perhaps that is just the air conditioning speaking?

Student Wellbeing

The Media Team is assisting in the development of a presentation to help promote new strategies for the co-ordinated Student Wellbeing Programs. These programs include Public Purpose, Leadership and Global Citizenship Programs.

Learning Commons Advertising

Perhaps you have noticed the quality of advertising is improving on the screens in the Library Learning Commons? We think you have, as advertising requests have tripled! Keep them coming.
Finally, a Book Week advertisement in a newsletter about media... but check out the lovely Photoshop job on these boys! Can you tell who they are? *Hint: years seven and eight.*
