Winter Edition 2020

As you relax after a frantically busy year, we hope you find some good books to enjoy in a warm place! Our Holiday Reads section features new books added to the collection this term, or you might find inspiration from the list of best-selling books published the year in which you were born. This edition also features Science Reference Centre, one of our extensive collection of databases, and two ClickView enhancements which you might find useful.

Take care and enjoy the break!

This edition will feature:

- Holiday Reads
- Science Reference Centre Database
- ClickView Updates
- Academic Integrity
- ATOM Study Guides
- Just for Fun

Holiday Reads

The Senior Library has an extensive collection of staff reads available for borrowing. Each month we are fortunate to have a selection of new releases delivered to our door just for you! Click here to view the latest holiday reads or pop into the library today!
Our students have access to an extensive number of databases via our Library website, and one of these is Science Research Centre. Covering the whole spectrum of Science topics from Chemistry to Health and Medicine to Wildlife to Earth Science, this database is a valuable repository for a multitude of science-oriented content. With over 200 full-text periodicals and journals, over 200 reference ebooks from top educational publishers and university presses, more than 1,000 science experiments and a vast collection of images, it is designed to meet the needs of student researchers.

As of April this year, a new collection of videoclips was also added to the database, featuring more than 2,000 videos from top educational publishers:

- **Boclips**: A collection of nearly 200 short-form clips that are curated, copyright-cleared, and ready for the classroom; includes videos from LearnZillion, Paul Andersen with Bozeman Science, PBS LearningMedia’s Crash Course with John Green, and TED-Ed.
- **Media4Math**: Approximately 100 video tutorials in algebra and geometry.
- **Nature Picture Library**: More than 1,500 video clips featuring footage of animals in their natural habitats (no sound).
- **Twig Education**: Nearly 200 three-minute videos that align with Next Generation Science Standards (NGSS) and cover topics in the earth, space, life, physical and applied sciences.

Access this database from any of our Science Assignment Help guides or from the Science eResources page.

---

The need for streaming videos to students at home during the COVID shutdown prompted ClickView to develop an app that integrates with Microsoft Teams, allowing direct access to the ClickView library from Teams without the need to switch between platforms. While ClickView has been integrated with OneNote for some time, the Teams integration makes it even easier for teachers to share educational videos with students, with full search and embed functionality. Click here for more information on how to do this.

A new ClickView feature, Movies + TV has now been activated in our ClickView subscription. This feature presents a blend of entertainment and education in a safe and secure environment. From David Attenborough to Disney films and thought-provoking theatre, all programs are designed to engage and entertain. Teachers can access Movies + TV via the user settings dropdown, while students have access via the main navigation bar. Read more about it here.
**Academic Integrity**

One of the 11 types of academic misconduct, as outlined by the QCAA, is plagiarism and the lack of attribution of another person's work. In order to assist our History students to reference accurately and consistently using APA style, the Library and History Department have put together a Quick Reference Guide targeting the types of sources needed by History students, along with History-specific examples. Feedback from both teachers and students has been positive.

---

**ATOM Study Guide Spreadsheet**

Australian Teachers of Media (ATOM) is pleased to launch a key educational resource for teachers, parents and students: The ATOM Study Guide Spreadsheet, providing an overview of, and access to, a selection of ATOM Study Guides from the vast library available from The Education Shop.

ATOM has curated this list, and their corresponding streaming products, into twenty-one related areas of study:

- Art & Artists
- Cultural Studies
- Drama
- Early Childhood
- Ethics
- English
- Environment/Geography
- Health & PE
- History
- Indigenous
- Legal Studies
- Literature
- Mathematics
- Media
- Music
- Politics and Law
- Psychology/Sociology
- Science
- Sport & Gender
- Studies of Society and Environment
- Youth Issues
